Tvarová podobnost

Doplň do prázdných obdélníků čáry tak, aby každý obdélník měl svého dvojníka. Stejně obdélníky spoj čarou a stejně vybarvi.

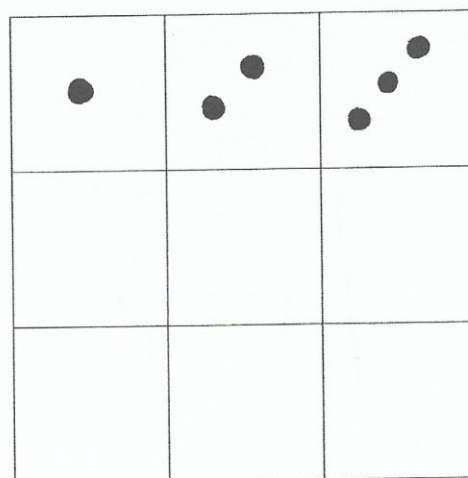

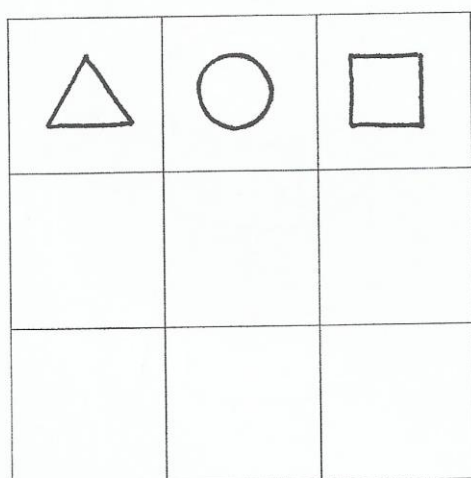

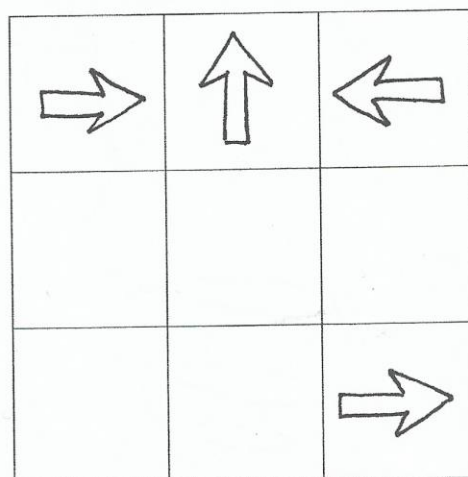

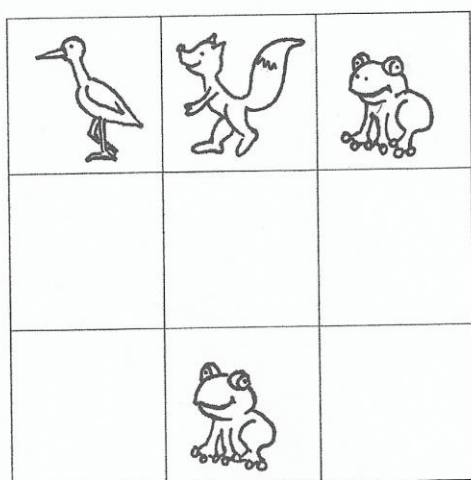

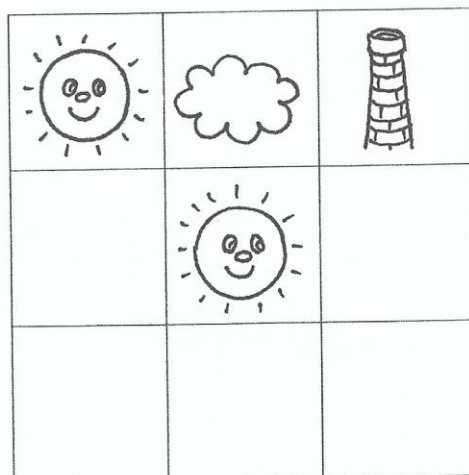

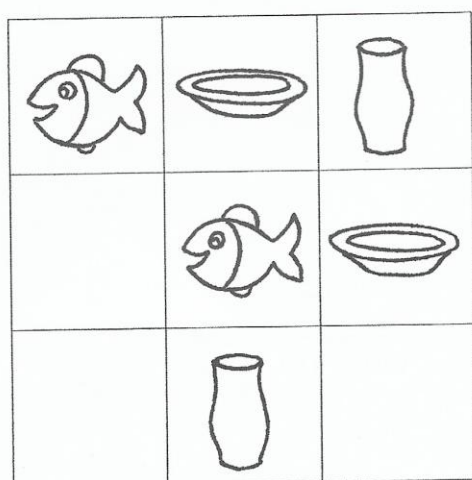

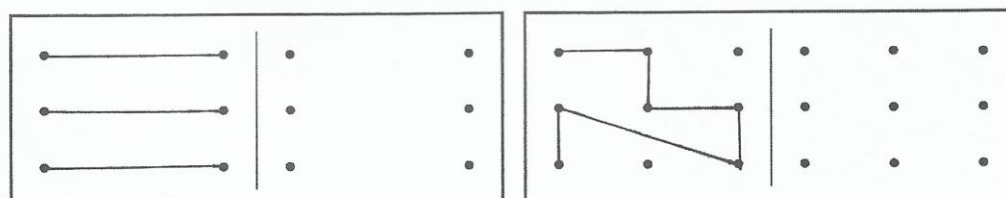

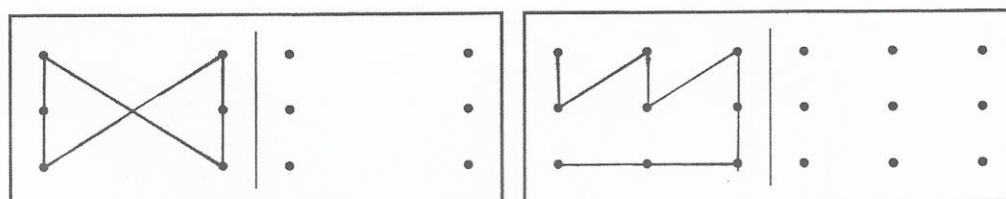

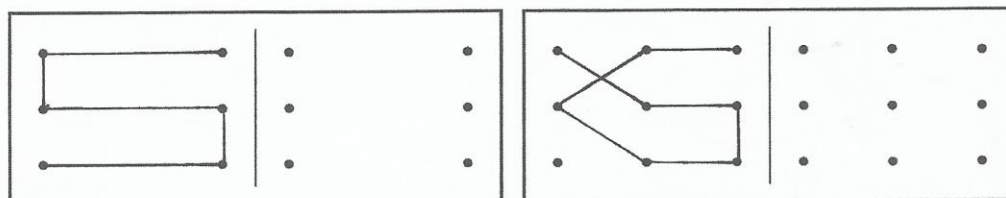

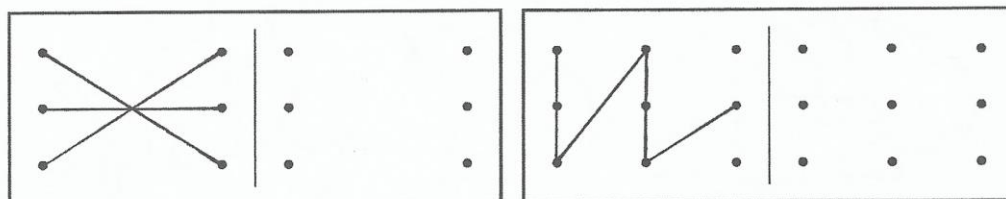

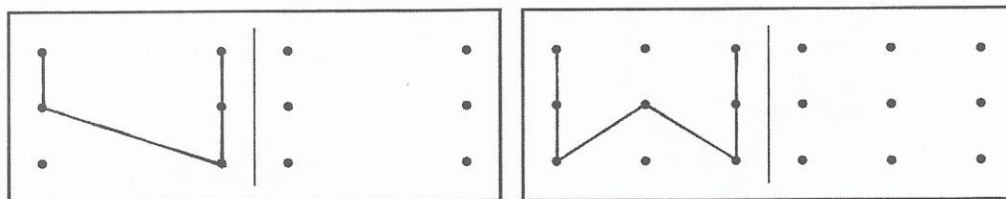

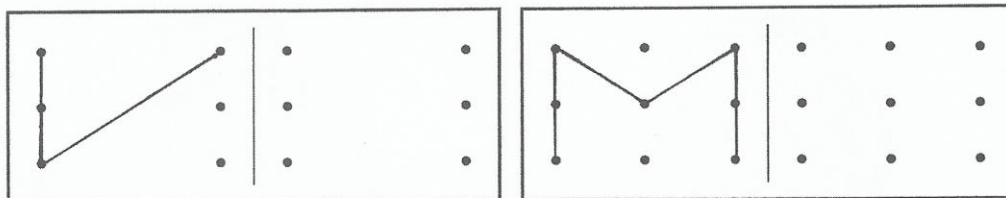

Na každém řádku dokresli obrázky tak, aby byly úplně stejné jako na vzoru, který je v prvním (silném) čtverci.

- Doplň do tabulek obrázky tak, aby se v žádném řádku ani sloupci žádný obrázek neopakoval.

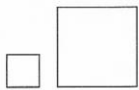

- Čaroděj mával kouzelnou hůlkou. Překresli podle vzoru, kudy se hůlka pohybovala.

dva zelené kruhy

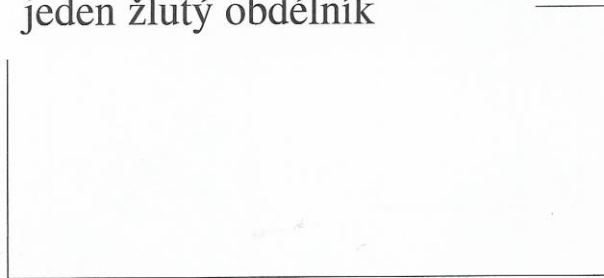

tři modré čtverce

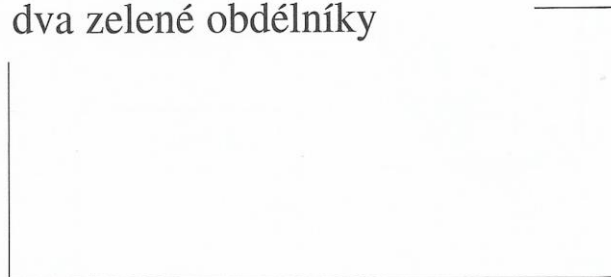

čtyři červené trojúhelníky

Více – méně

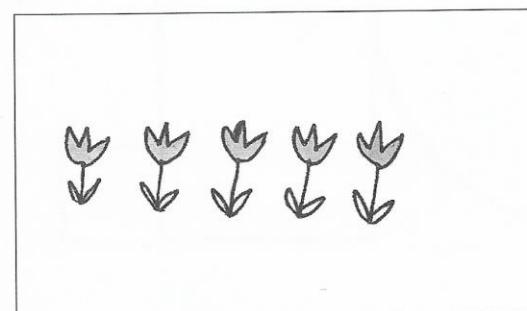

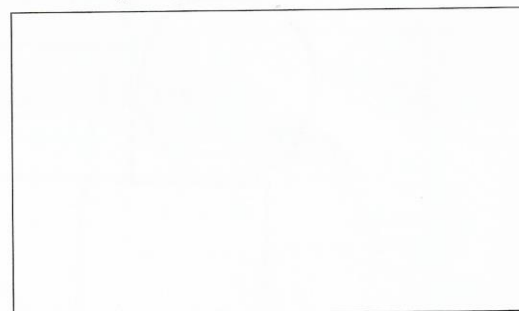

Namaluj o jeden balonek více:
Kolik jich bude?

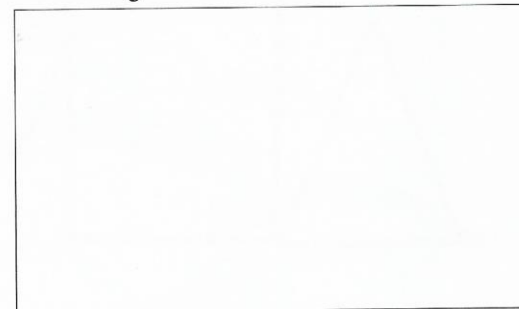

Namaluj o jeden mrak méně:
Kolik jich bude?

Namaluj o dva sněhuláky více:
Kolik jich bude?

Namaluj o dva tulipány méně:
Kolik jich bude?

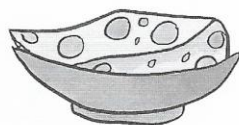

Více – méně

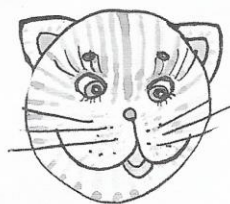

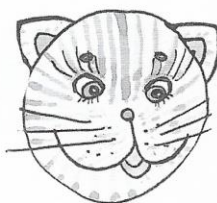

Spoj dvojice čarou. Dvojice vybarvi. Nevybarvený obrázek ti jasně ukáže, čeho je víc a o kolik.

Má každá myška svůj sýr? Čeho je víc? O kolik?

Má každá kočička svou misku? Čeho je víc? O kolik?

Má každý chlapec svou hokejku? Čeho je víc? O kolik?

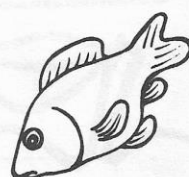

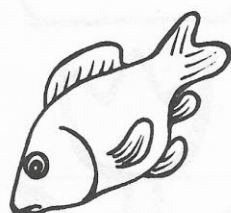

Má každá holčička svůj míč? Čeho je víc? O kolik?

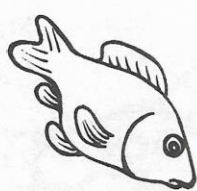

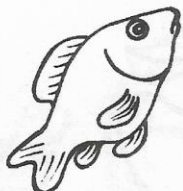

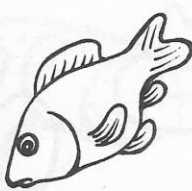

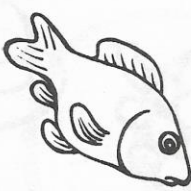

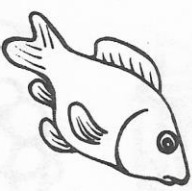

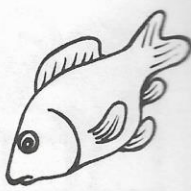

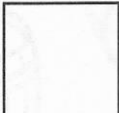

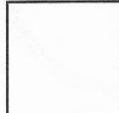

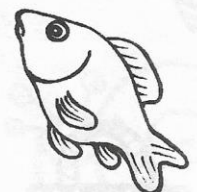

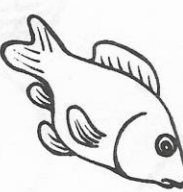

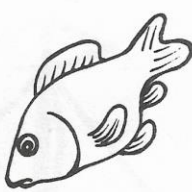

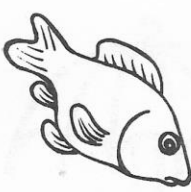

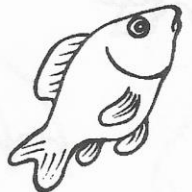

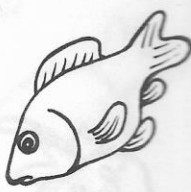

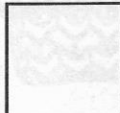

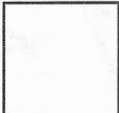

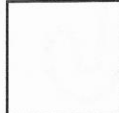

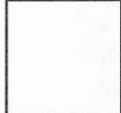

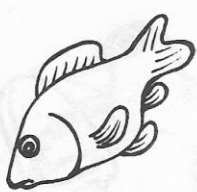

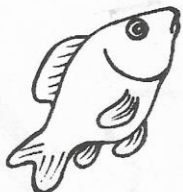

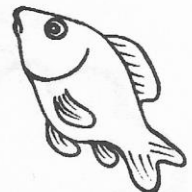

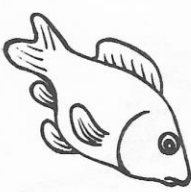

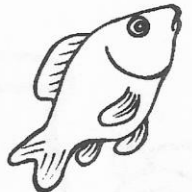

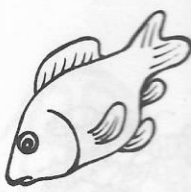

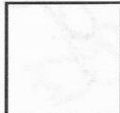

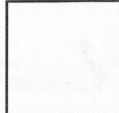

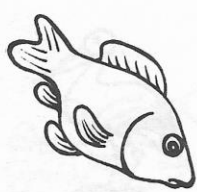

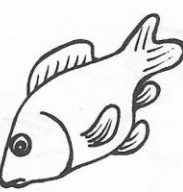

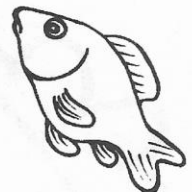

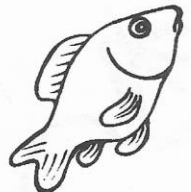

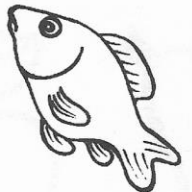

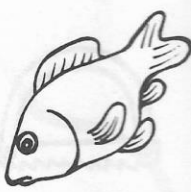

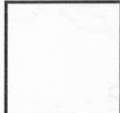

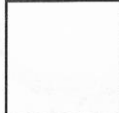

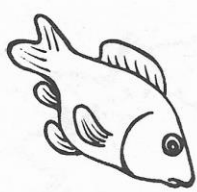

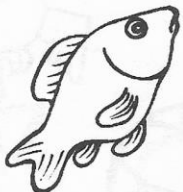

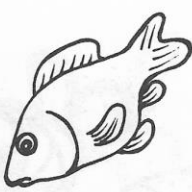

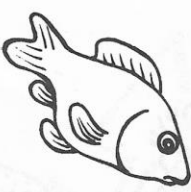

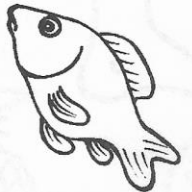

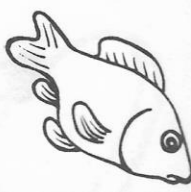

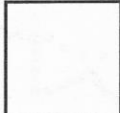

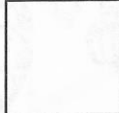

V každé řadě vybarvi modře obrázek, který je nejmenší, do kroužku dej obrázek, který je největší.

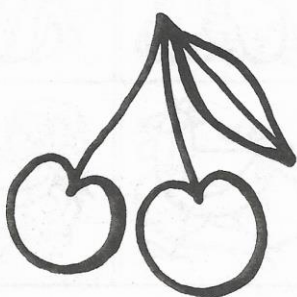

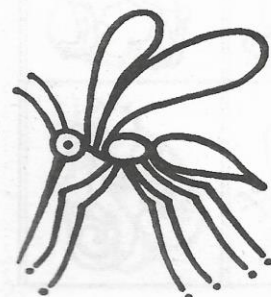

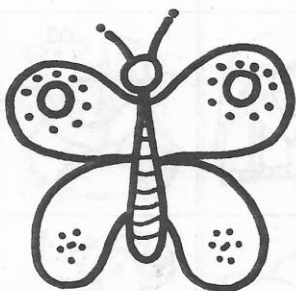

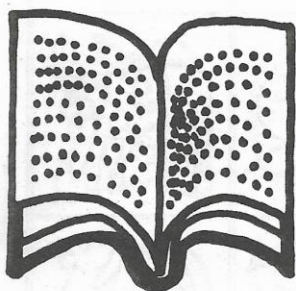

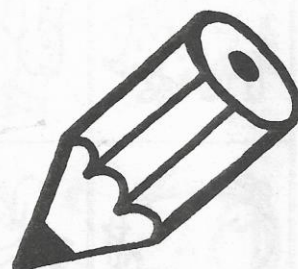

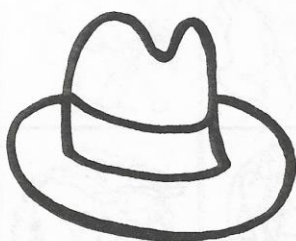

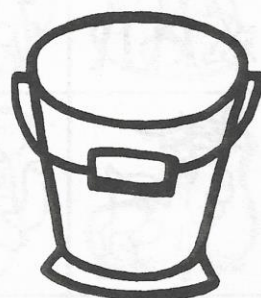

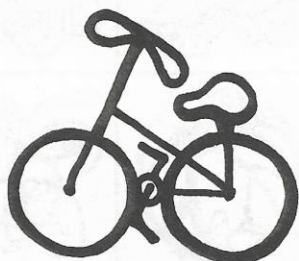

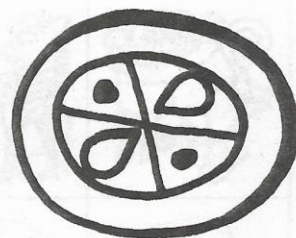

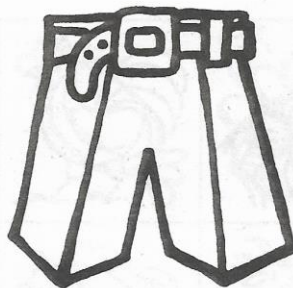

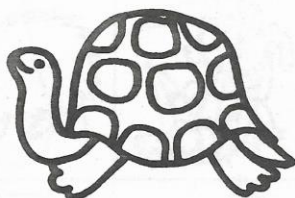

Pod každou rybku dokresli šipku tak, aby ukazovala, kterým směrem plave. Každý směr pojmenuj. Červeně vybarvi ty ryby, které plavou doleva nahoru.

					
					
					
					
					
					
					
					
					
					

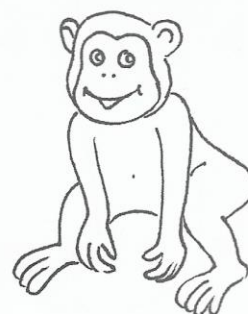

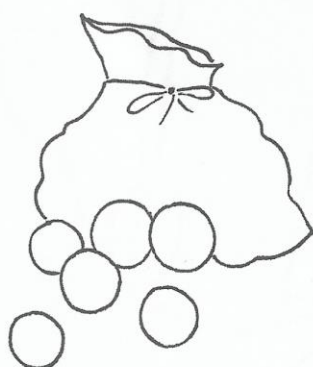

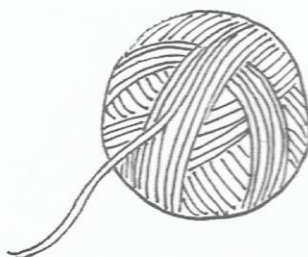

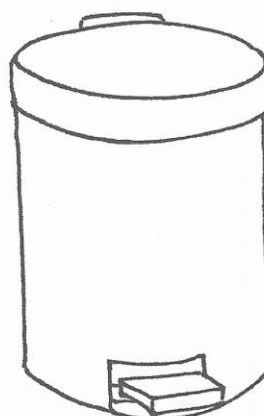

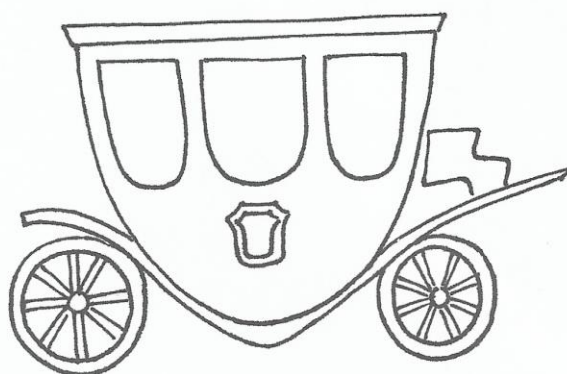

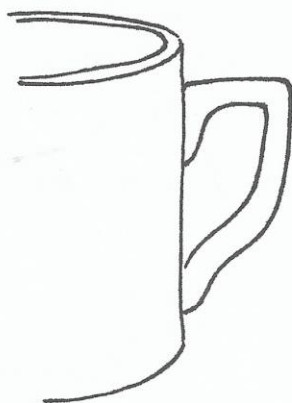

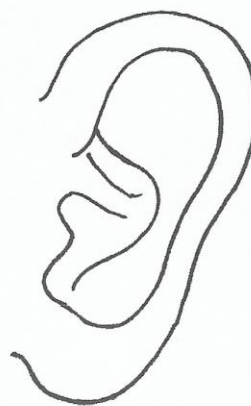

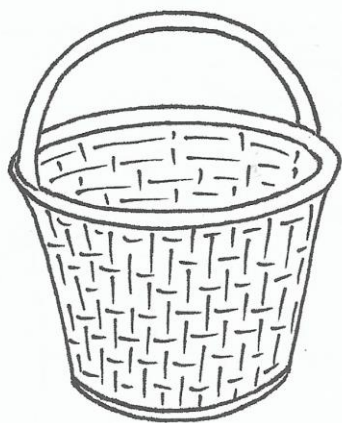

Všechny obrázky pojmenuj. Vybarvi ty, jejichž název začíná hláskou K.

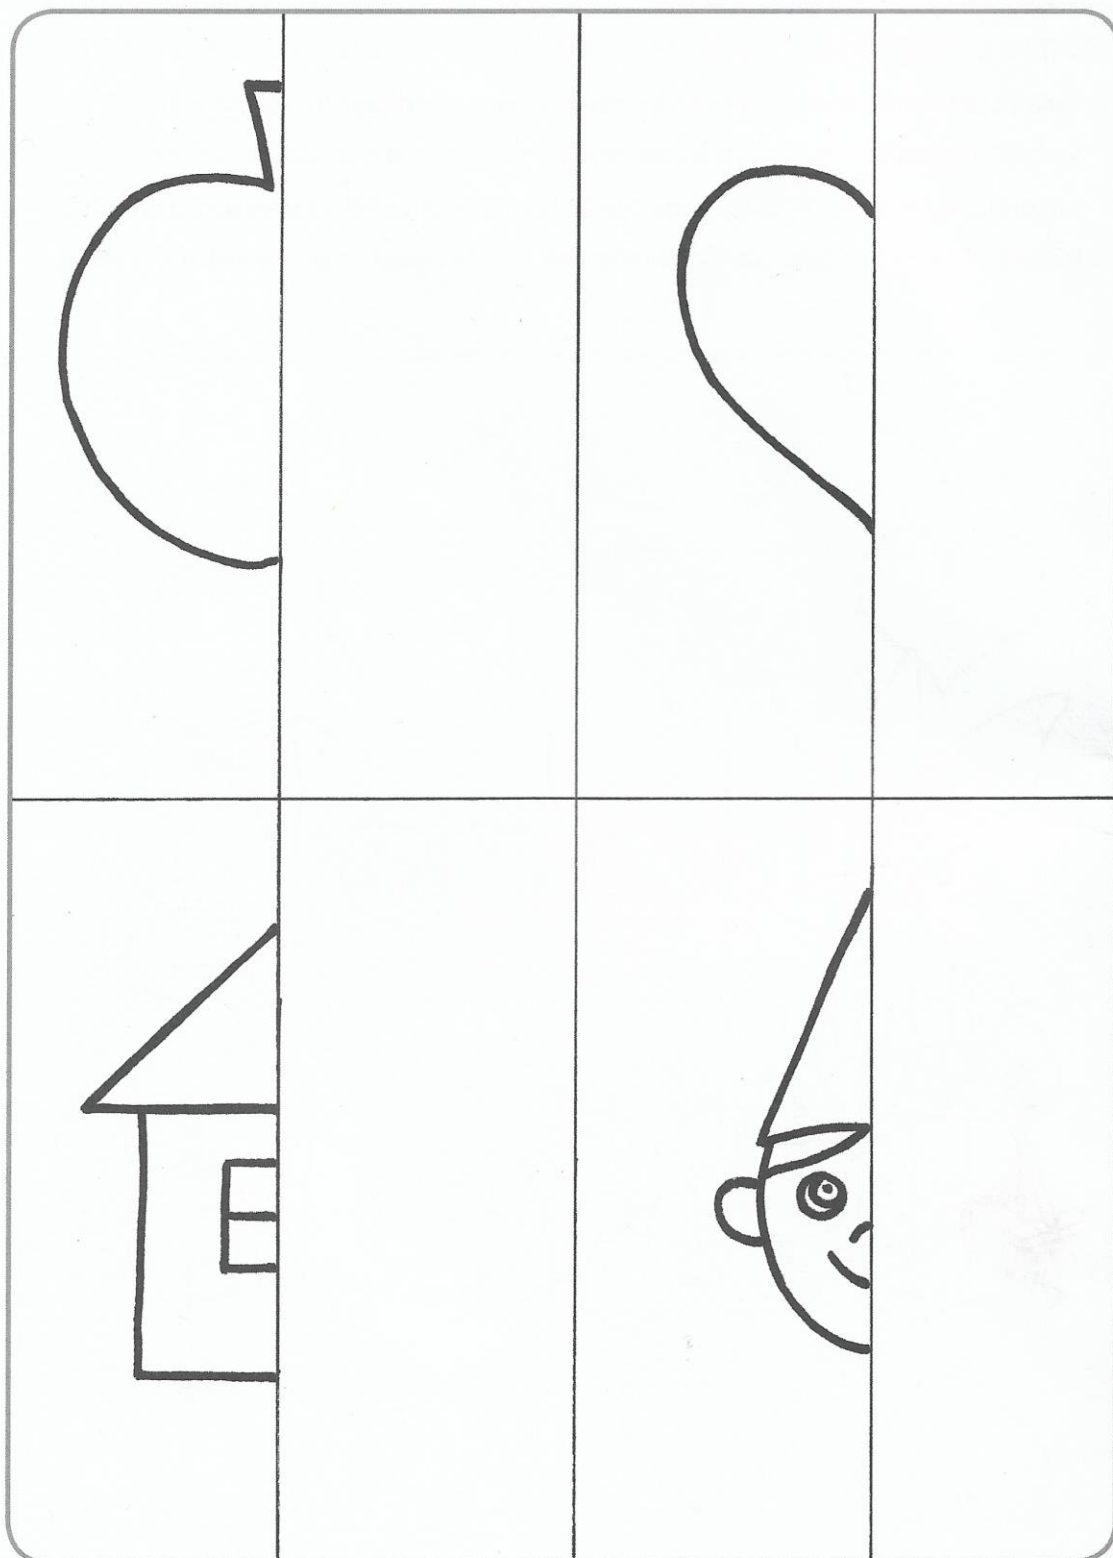

- Obrázky, v jejichž názvu uslyšíš písmeno Č (nemusí být na začátku slova), zakroužkuj červeně, a slova, kde uslyšíš C, zakroužkuj modře.

■ Obrázky vymaluj a spoj čarou slova, která stejně znějí, ale mají jiný význam.

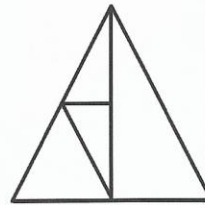

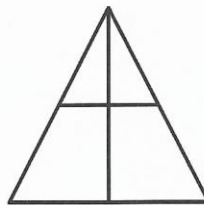

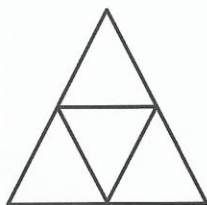

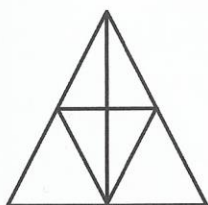

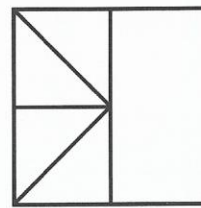

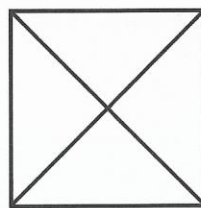

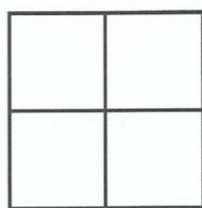

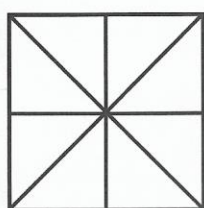

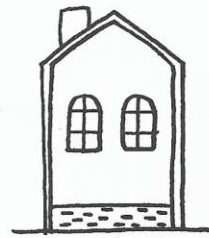

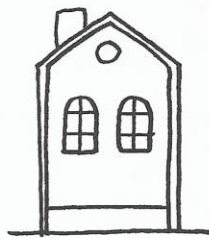

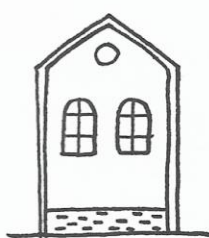

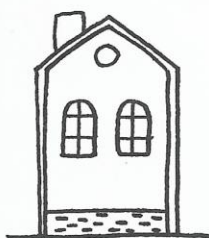

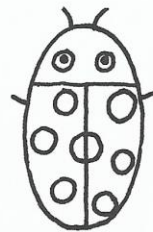

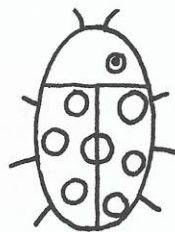

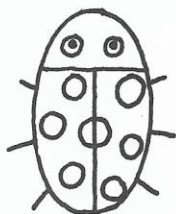

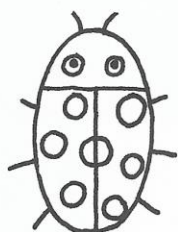

■ Dokresli druhou polovinu obrázků.

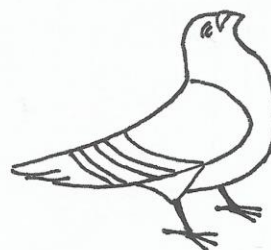

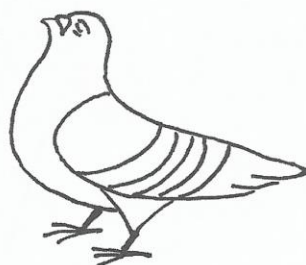

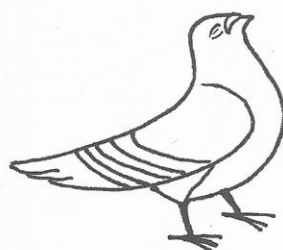

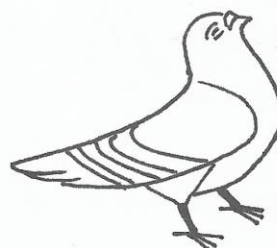

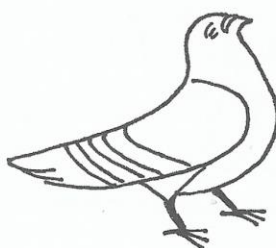

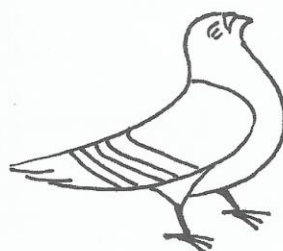

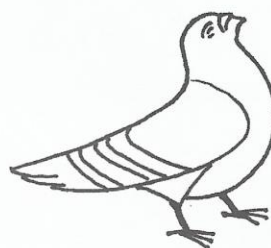

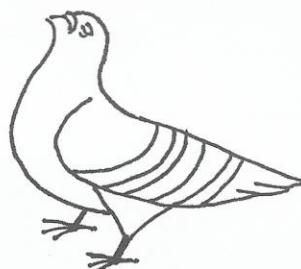

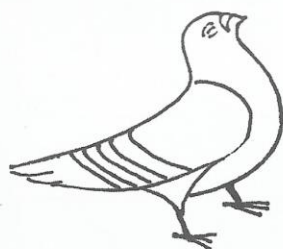

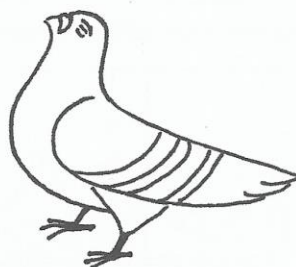

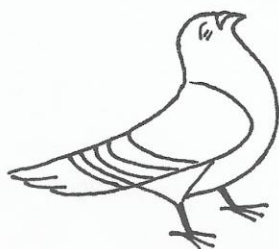

Z8: Doplní chybějící části v obrázku

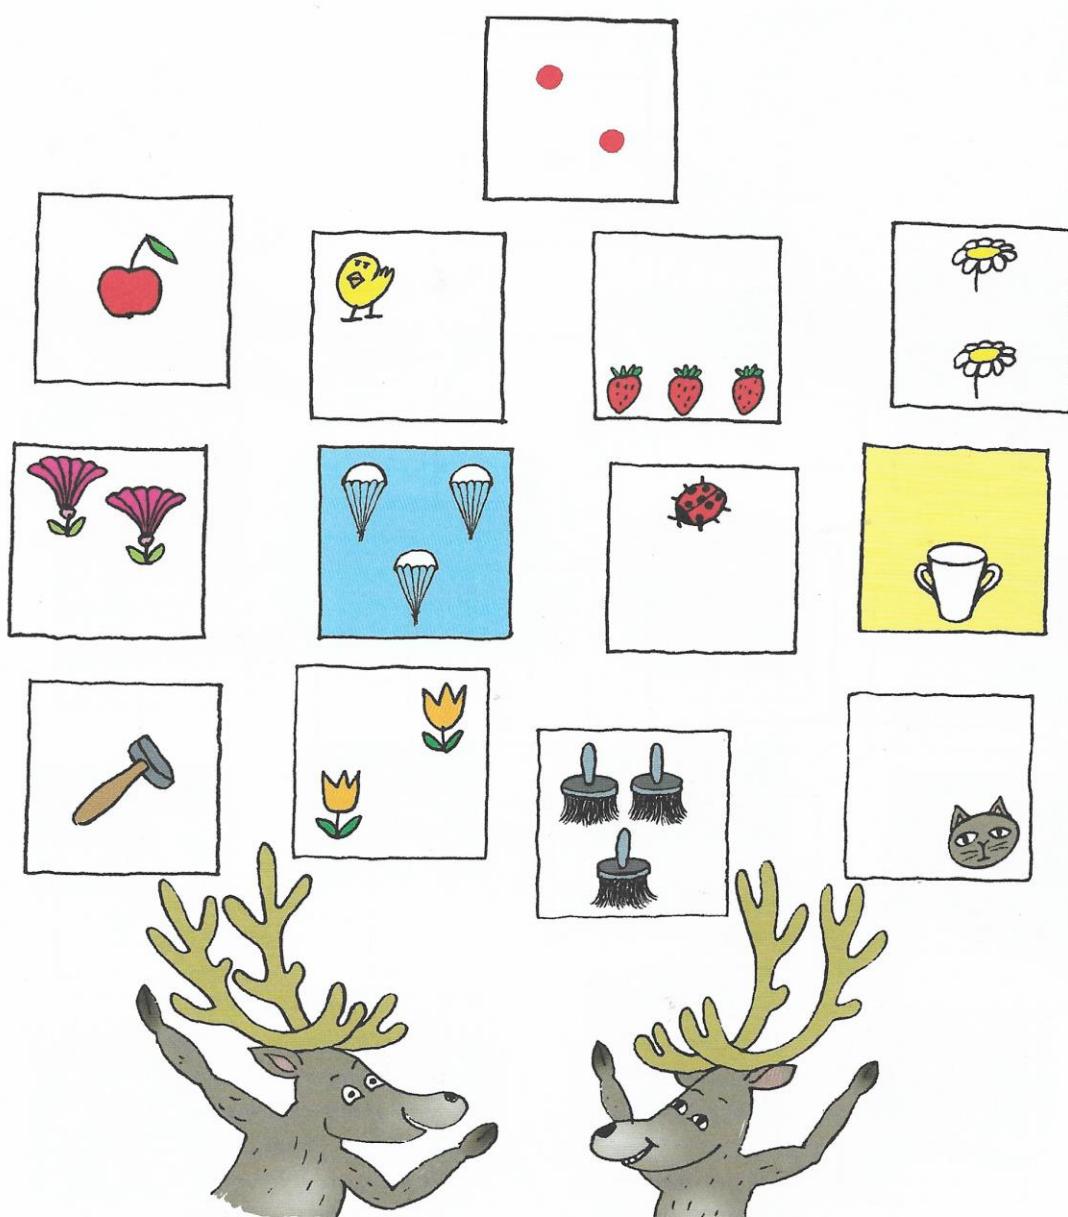

- Holoubky, kteří se dívají doprava, zakroužkuj modře a ty, kteří se dívají vlevo, červeně. Spočítej, kolik holubů se dívá doprava a kolik doleva.

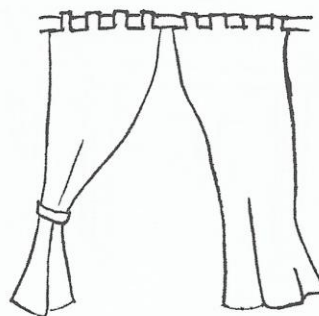

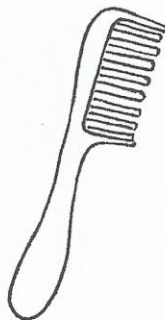

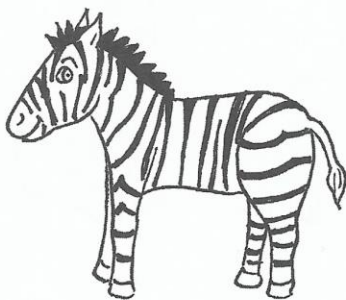

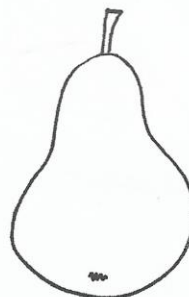

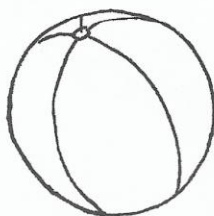

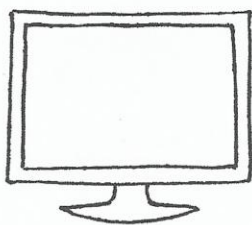

Bob prošel dvakrát kolem regálů s hračkami, ale nikde sobi neviděl. „Asi se dívám špatně,“ řekl si. Při další obchůzce vždy vyndal hračky, které stály vepředu, až konečně své kamarády našel. Ti byli ale překvapení, kdo za nimi přišel. Cítili se vzadu zastrčení a trochu osamocení. Mysleli si, že i Bob na ně zapomněl. A teď takové milé překvapení. Nejen že je Bob přišel navštívit, ale rovnou přinesl i hru.

Pojem stejně, počet dvě, množství bez ustálené konfigurace. Karty, kde je stejný počet předmětů, může dítě spojit čarou s horní, vzorovou kartou.

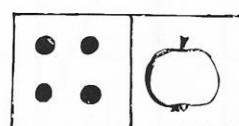

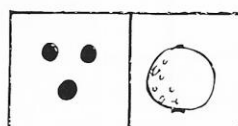

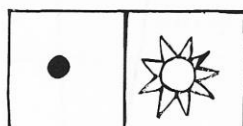

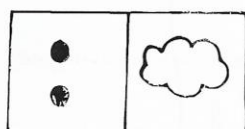

■ Vybarvi pouze obrázky, jejichž název začíná hláskou Z.

Ve kterém soudku najde medvěd med? Tuto cestičku obtáhni pečlivě červenou barvou. Ostatní cestičky obtáhni zeleně.

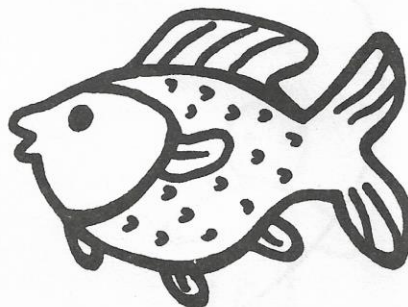

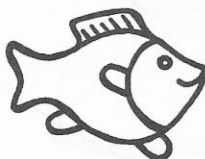

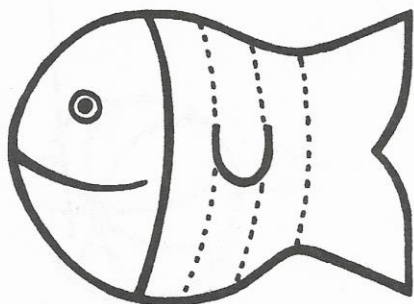

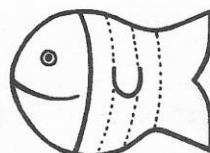

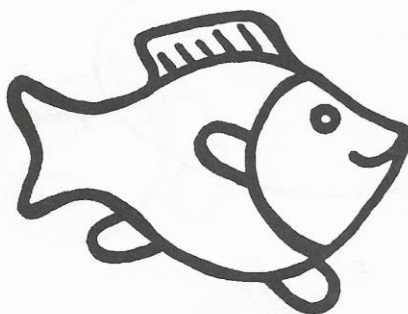

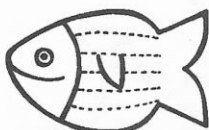

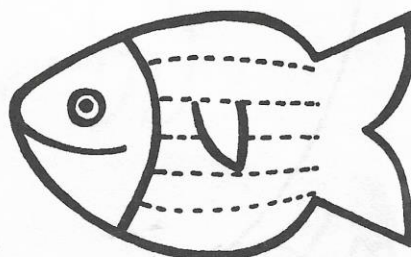

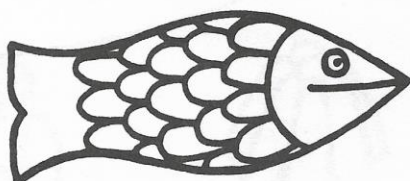

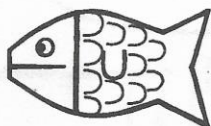

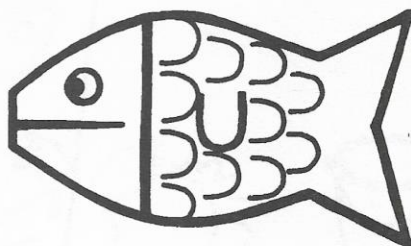

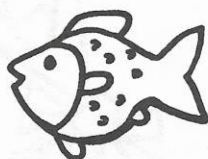

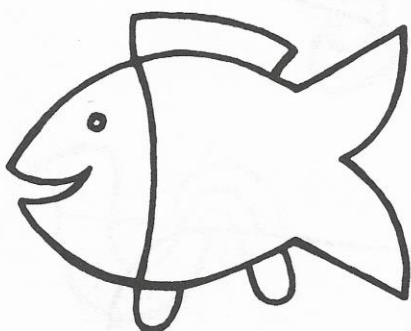

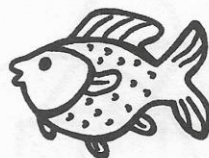

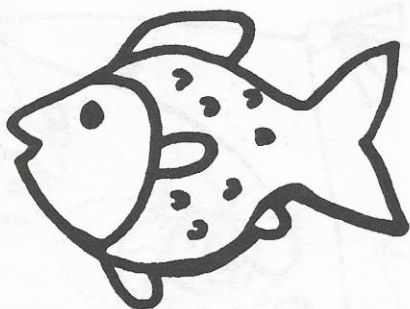

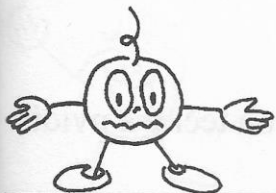

Zeleně vybarvi to, co je živé. Žlutě vybarvi to, co je neživé.
Kterých obrázků je víc? Spočítej, o kolik je jich víc.

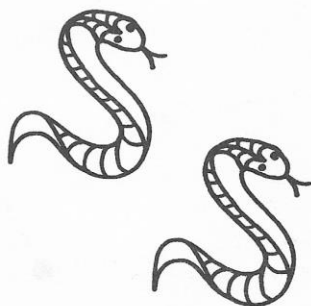

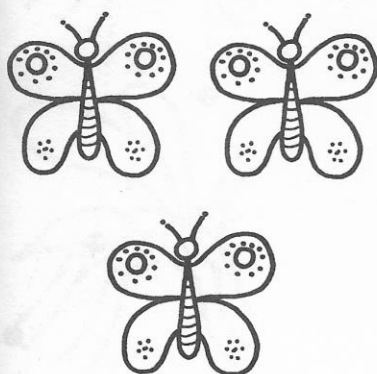

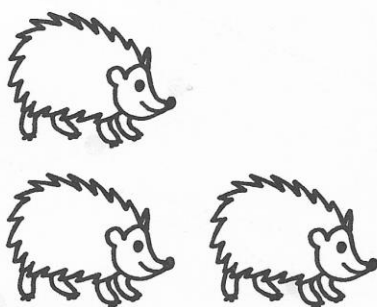

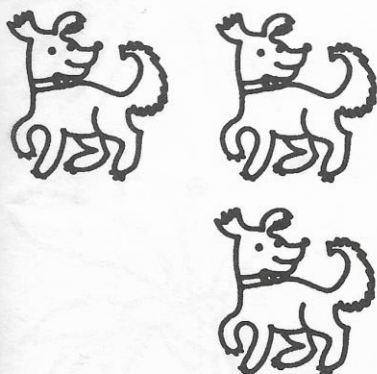

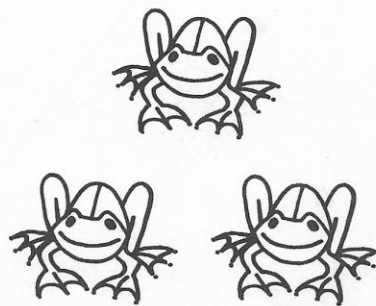

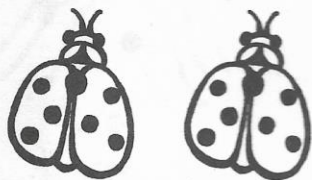

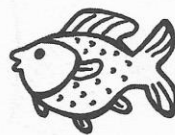

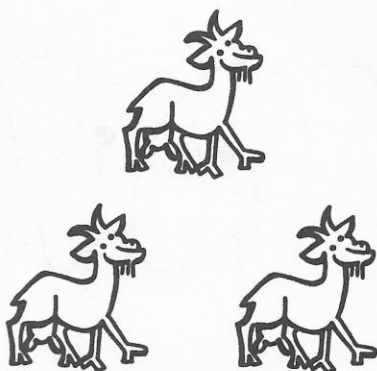

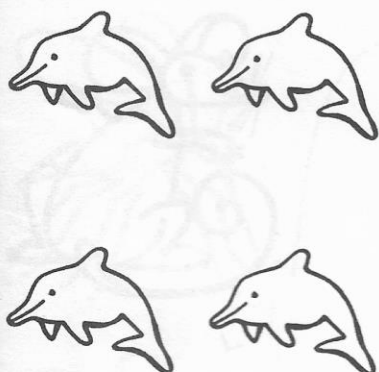

Velké ryby vybarvi modře, malé zeleně. Potom spoj čarou vždy jednu velkou a jednu malou rybu. Kolik velkých ryb zůstalo?
